EVAPORATED MILK MEMORANDUM NO. 3

To: All Evaporated Milk Samplers

From: Rob R. Slocum, Dairy and Poultry Branch

Subject: Announcement FSC-598 Dealing with the Purchasing of Evaporated Milk.

Attached hereto is a copy of Announcement FSC-598 dated May 8, 1942, dealing with the purchase of evaporated milk by the Federal Surplus Commodities Corporation. This announcement supersedes FSC-499.

You will note that in most respects Announcement FSC-598 is similar to the announcement which it supersedes. The most important change is made under packing and marking where it states that "evaporated milk shall be packed at the rate of  $14\frac{1}{2}$  ounces in hermetically sealed cans, which cans shall be labeled with the vendor's own legal commercial labels." Thus all evaporated milk purchased under this announcement shall be labeled with commercial labels regardless of the type of case in which it is packed.

Offers may be submitted so as to be received by 2 p.m. (E.W.T.) on Tuesday of each week until further notice. Offers received after 2 p.m. each Tuesday and before the following Thursday will not be considered.

All milk offered shall be ready for sampling on the date indicated in the offer, and inspection shall be completed and delivery tendered within 30 days after the date specified in the offer as the date on which the milk will be ready for sampling.

Samples shall be taken and forwarded to the laboratory in line with previous instructions covering the sampling procedure.

Rob R. Slocum
